## TradeStation Crypto Now Live on TradingView – Customers Can Now Invest, Trade and Earn Interest on Eligible Crypto Balances in Their Accounts Without Leaving the TradingView Platform

*TradingView users can now trade crypto through TradeStation Crypto, in addition to stocks, ETFs, and commodity futures through an existing relationship with TradeStation Securities, thus creating a comprehensive trading experience*

**Plantation, FL (October 6, 2020)** – [TradeStation Group, Inc.](#) today announced that its subsidiary, [TradeStation Crypto, Inc. \(TradeStation Crypto\)](#), has integrated with [TradingView, Inc. \(TradingView\)](#) to allow TradingView users to apply for, and invest, trade and earn interest on eligible crypto holdings in, TradeStation Crypto accounts. Through the integration, TradeStation Crypto will be the first crypto broker on TradingView to offer consolidated market data trading capabilities from multiple connected crypto venues. Users can take advantage of intelligent order routing for cross-venue trade executions.

TradeStation Crypto brings with it the TradeStation brand's mature market mindset and history, along with the organization's experience as a pioneer in the financial technology and online brokerage industries for active trader markets. TradeStation Securities, another subsidiary of TradeStation Group, launched a similar API-powered integration with TradingView in September 2019 to unlock stocks, ETFs and futures trading to TradingView users. TradingView's users can now also trade crypto through TradeStation Crypto without having to leave the TradingView platform.

"TradeStation first joined forces with TradingView a year ago as the first U.S. multi-asset class broker to offer TradingView users access to our [award-winning](#) brokerage services," said John Bartleman, President of TradeStation Group, Inc. "Now, we are excited to bring TradeStation Crypto on board as an exciting new asset to the self-directed trader market."

Launched in November 2019, TradeStation Crypto is not an exchange, instead, TradeStation Crypto's approach is to aggregate multiple pools of liquidity in a consolidated market data feed combined with an intelligent order-routing system designed to give its customers better visibility and trade executions.

"Traders using TradeStation's services have left overly positive reviews on TradingView since our initial integration last year," said Denis Globa, CEO of TradingView. "It is only logical to expand on this initial success by adding additional datasets and tradable assets. In this regard, we're excited to see TradeStation Crypto offer our community new opportunities to invest in crypto and to earn interest on eligible crypto account balances.
