Global Financial AI, LLC Connects its Financial AI® Platform to TradeStation's Execution Capabilities

New integration connects AI-powered strategy modeling with multi-asset execution for active traders and institutions

PLANTATION, Fla., March 10, 2026 — [TradeStation Securities, Inc.](#)

("TradeStation"), an award-winning*, self-clearing online brokerage firm for trading stocks, options, futures, and futures options, announced a new integration with Global Financial AI, LLC's Financial AI Platform.† The integration combines advanced analytics with automated multi-asset execution, enabling active traders and institutional clients to move seamlessly from strategy ideation to live trading. For TradeStation, it represents another step in delivering additional tools for serious traders.

With this integration, traders can design, test, benchmark, and optimize complex active investment strategies using simple, natural-language prompts within Financial AI, then execute the trades through TradeStation's brokerage service. The integration gives traders a streamlined path from strategy design to live execution across equities and options.

Financial AI transforms prompts into actionable insights, generating performance metrics, evaluating weaknesses, benchmarking results, and recommending optimizations.‡ The platform supports technical, macro-driven, long and short equity portfolios, options strategies, event-driven approaches, and multi-strategy allocations — all integrated with TradeStation for automated execution.

"TradeStation is committed to supporting active traders at every stage, from institutional-grade technology and reliable execution to integrations with advanced fintech platforms," said John Bartleman, President and CEO of TradeStation Group, Inc. "Bringing Global Financial AI into our API ecosystem gives traders a seamless path from strategy design to live execution — expanding what's possible."

"Global Financial AI is redefining how investment strategies are created, validated, and executed," said Pouya Taaghjol, PhD, Founder and CEO of Global Financial AI, LLC. "By turning simple prompts into advanced performance analytics and automated multi-asset execution, we help investors move seamlessly from idea to live deployment. Working with TradeStation allows us to combine AI-driven strategy modeling with a trusted brokerage infrastructure to deliver a more personalized and powerful trading experience for active market participants."

About TradeStation Securities, Inc.

Founded in 1995, TradeStation Securities, Inc. (Member NYSE, FINRA, SIPC, NSCC, DTC, OCC, NFA & CME) offers self-clearing equities, options, futures, and futures options brokerage services as a licensed securities broker-dealer with the Securities and Exchange Commission and futures commission merchant with the Commodity Futures Trading Commission and is a member of major equities and futures exchanges in the United States.

About TradeStation Group, Inc.

Founded in 1982, TradeStation Group companies provide institutional-grade fintech tools and account-related services – and are where traders can find their home. TradeStation Group, Inc. is the parent company of several subsidiaries, including TradeStation Securities, Inc. and TradeStation Technologies, Inc. TradeStation Group companies seek to deliver the ultimate trading experience to retail and institutional clients that need a customizable trading ecosystem to perform their strategies. TradeStation Technologies provides award-winning* trading and analysis platforms through TradeStation Securities' self-clearing online brokerage services for equities, options, futures, and futures options. These advanced trading tools are accessible on desktop, web, and mobile devices, as well as via API technologies that provide seamless access to TradeStation Securities' brokerage environment through third-party platforms. Created by traders, for traders, TradeStation Group companies' institutional-level offerings cater to those who are born to trade. [Learn more about TradeStation Group companies.](#)

About Global Financial AI, LLC

Global Financial AI, LLC developed Financial AI®, a specialized platform for financial intelligence, modeling, and backtesting customized investment strategies with integrated forecasting capabilities. Supporting asset classes like equities and options, the platform leverages technical, economic, and valuation indicators to meet user-specific objectives.
