Quasar Markets Integrates with TradeStation to Streamline Research-to-Execution for Active Traders

New connectivity delivers institutional-grade market data with TradeStation execution access, reducing friction and accelerating decision-to-trade workflows

Plantation, Fla., April 30, 2026 – TradeStation Securities, Inc. (“TradeStation”), the brokerage firm built for active equity and derivatives traders, today announced that Quasar Markets, Inc.*, a research and execution workflow platform, has connected to TradeStation’s execution services. This integration expands the ecosystem of third parties connected to TradeStation’s execution services via the TradeStation API.

The integration enables traders to move more efficiently from Quasar Markets’ market research and portfolio analysis to live trade execution with TradeStation. By connecting insights and execution in a single workflow, traders can maintain momentum and make decisions faster without disrupting their existing trading setup.

With this connectivity, users can review watchlists, monitor portfolio exposure, evaluate setups, and route trades directly through TradeStation. The Quasar platform also delivers institutional-grade market data in a clean, decision-ready format, allowing traders to analyze markets and act with confidence. Traders can identify an opportunity in a volatility strategy, assess it in the context of their portfolio, and execute the trade[†] with the reliability of TradeStation’s brokerage services.

“Active traders need speed, reliability, and control in every market condition, and they need their tools to work together without interruption,” said John Bartleman, President and CEO of TradeStation Securities’ parent company, TradeStation Group, Inc. “With Quasar Markets’ API integration, traders are able to keep momentum from insight to execution while continuing to use the TradeStation brokerage experience they trust.”

“Our integration with TradeStation marks an important milestone for Quasar Markets,” said Steven Orr, Founder & CEO of Quasar Markets. “By combining our AI-driven analytics with TradeStation’s established trading infrastructure, we are bringing together sophisticated insights and efficient execution in a more unified experience. This collaboration reflects our long-term focus on helping investors access the markets with greater clarity and confidence.”
